

ENGINEERED SOLUTIONS AND TURNKEY SERVICES FOR ALL BRANDS OF HEAT EXCHANGERS

When heat transfer equipment fails, the pressure is on — and you need a partner who knows these systems from the inside out.

TEi Technical Services brings OEM-level expertise to inspection, repair, and field services for all brands of heat transfer equipment. From visual inspections and advanced NDE testing to ASME code vessel repairs and full retube services, our teams are equipped to diagnose problems accurately and get your equipment back online, **fast**. And because our engineering services and field capabilities operate under one roof, you're never handed off to someone who doesn't know the full picture.

As a Babcock Power Inc. subsidiary, TEi Technical Services is backed by a family of companies united by a single standard: safety, integrity, and quality—on every project, for every customer.

ONE SOURCE. MANY SOLUTIONS.

TEi Technical Services has the depth and reach to handle virtually any challenge in heat transfer, backed by specialists across construction, environmental, fabrication, and beyond.

VISUAL INSPECTIONS

- Condensers
- Feedwater Heaters
- Moisture Separator Reheaters (MSR)
- Shell & Tube Heat Exchangers
- Fired Heaters

NON-DESTRUCTIVE EXAMINATION (NDE)

- Ultrasonic Testing (UT)
- Phased Array Ultrasonic Testing (PAUT)
- Eddy Current Testing (ECT)
- Remote Field Testing (RFT)
- Vacuum Leak Testing

REPAIR & RETUBE SERVICES

- Tube Plugging
- ASME Code Vessel Repairs
- Modifications and Alterations of Heat Transfer Equipment

ENGINEERING SERVICES

- Troubleshooting
- Thermal-Hydraulic Analysis
- Structural/Vibration Analysis
- Pipe Stress Analysis
- Heat Exchanger Life Assessments
- Up-rate Analysis
- Re-Rates
